PROJECT DETAILS

Project Name: Full-Stack Blogging Web App

Description:

Developed a Full-Stack Blogging Web App using Java, Spring Boot, Spring MVC, Spring Security, and Eureka Service Registry. This comprehensive platform allows users to create, manage, and share blog posts and categories.

Key Features:

Backend API with Spring Boot:

- ➢ User registration, login, and secure JWT authentication.
- ➢ Category management and CRUD operations for blog posts.
- ➢ RESTful API for file uploads and downloads.

Frontend with Spring MVC and JSP:

- ➢ User-friendly interface with JSP.
- ➢ Category creation, individual visibility, and blog post management.
- ➢ Common page for read-only access to others' posts with pagination.

Microservices Architecture:

- ➢ Eureka Service Registry for application registration and discovery.
- ➢ Utilized Feign clients for frontend-backend communication.

PROFESSIONAL TRAINING

Trained on JAVA, J2EE, HIBERNATE, SPRINGBOOT from ineuron technologies, Bangalore
